Metal-film thermopiles for use with rabbit right ventricular papillary muscles

L. A. Mulieri, G. Luhr, J. Trefry, and N. R. Alpert

Estimates of quantal-release and binomial statistical-release parameters at rat neuromuscular junction

D. F. Wilson

Somatostatin inhibition of glucose-induced electrical activity in cultured rat islet cells

C. S. Pace, M. Murphy, S. Conant, and P. E. Lacy

High sensitivity of cultured cardiac muscle cells to autonomic agents

K. Hermsmeyer and R. B. Robinson

Bioelectrical and contractile behavior of rabbit mesotubarium superius: estrogen withdrawal

J. T. Conrad

LETTERS TO THE EDITOR

Sodium flux ratios and electromotive force of sodium transport

S. I. Helman, R. G. O'Neil, R. S. Fisher, and D. D. Macchia

Page C165: M. P. Blaustein. "Sodium ions, calcium ions, blood pressure regulation, and hypertension: a reassessment and a hypothesis." Page C169: left column, paragraph 2, line 9 should read (with Na rate coefficient k_\text{Na}). Page C170: left column, top paragraph, lines 21–22 should read total cell Ca will increase by about 4–40 micromoles per liter fiber water. Left column, top paragraph, lines 23–24 should read 1,000–1,500 micromoles per liter fiber water.
