The American Journal of Physiology-Cell Physiology promotes contemporary and innovative research that seeks answers to physiological questions related to normal and abnormal cellular function. It brings together contributions from many scientific disciplines, including cell and molecular biology, biophysics, biochemistry, immunology, and pharmacology. AJP-Cell Physiology covers all areas of cellular physiology, including:

- epithelial and membrane transport, ion channel regulation, volume regulation, ATPases
- vesicle trafficking and protein targeting, cell polarity, endo/exocytosis, secretion
- cellular differentiation, growth factors, angiogenesis, vascular, cardiac and smooth muscle biology, erythrocyte biology
- cytoskeleton, microtubules, actin, intracellular junctions, cell-matrix interactions, cell pathophysiology, inflammation, ischemia, toxicity, cell and mitochondrial respiration, apoptosis, cellular immunology
- cell imaging, intracellular signaling, pH, calcium, fluorescent probes

Authors are required to submit papers online at www.apscentral.org.

A Few HOT Articles

- Calcium, ATP, and ROS: a mitochondrial love-hate triangle
  Paul S. Brookes, Yisang Yoon, James L. Robotham, M. W. Anders, Sheng-Shing Sheu

- Role of Ca2+-activated K+ channels in human erythrocyte apoptosis
  Philipp A. Lang, Stefanie Kaiser, Swetlana Myssina, Thomas Wieder, Florian Lang, Stephan M. Huber

- Angiotensin II cell signaling: physiological and pathological effects in the cardiovascular system
  Puja K. Mehta, Kathy K. Griendling

- Bcl-2 family members and apoptosis, taken to heart
  Åsa B. Gustafsson, Roberta A. Gottlieb

- The molecular basis of skeletal muscle atrophy
  Robert W. Jackman, Susan C. Kandarian

- Nitric oxide, superoxide, and peroxynitrite: the good, the bad, and ugly
  J. S. Beckman, W. H. Koppenol

Reader & Author Benefits

- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/ajpcell
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals.

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.

To start your SUBSCRIPTION, e-mail: subscriptions@the-aps.org
To submit your MANUSCRIPT go to: www.apscentral.org

FURTHER INFORMATION: E-mail: subscriptions@the-aps.org, Call 301-634-7180, Fax 301-634-7418, or mail to The American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991 (USA)
Under the NIH Public Access Policy, NIH is asking its funded investigators to voluntarily submit to PubMed Central (PMC) the author's final manuscript of articles resulting from research supported in whole or in part with direct costs from NIH. According to the NIH, this policy applies only to manuscripts accepted for publication on or after May 2, 2005.

If you choose to submit your accepted manuscript to PMC, you will be asked to indicate when that manuscript should be made available to the public. As copyright holder of your article, the APS has the sole right to publish or disseminate it. However, the APS grants you permission to allow public release of your manuscript through PMC 12 months after publication in the print version of an APS journal.

This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication. NIH will be able to determine when 12 months have elapsed because APS sends NIH electronic feeds of the article metadata upon publication in a journal issue. Therefore, you can submit your accepted manuscript to PMC at the time of acceptance to an APS journal, and will not have to calculate or track time elapsed from publication.

NIH intends to use the PMC database of manuscripts for portfolio management; to create a permanent archive of articles based upon NIH-funded research; and to give the public access to research publications. In announcing this policy, NIH officials underscored that it is voluntary and there will be no sanctions of any kind against authors who do not submit their manuscripts. **If you have any questions with respect to the NIH Public Access Policy and the publication of your article in an APS journal, please contact Margaret Reich at mreich@the-aps.org.**
Call For Papers

*American Journal of Physiology-Cell Physiology*

Protein and Vesicle Trafficking, Cytoskeleton

The *American Journal of Physiology-Cell Physiology* is soliciting manuscripts in the area of intracellular protein and vesicle trafficking. Many hereditary and acquired human diseases involve defects in processes that normally lead to the correct addressing, packaging and delivery of functionally important proteins to their correct intracellular locations. Such processes include protein folding and quality control mechanisms, Golgi transport and posttranslational modifications, assembly of vesicle coats and the involvement of GTPases and their regulatory proteins, interaction of vesicles with microtubules and the actin cytoskeleton, vesicle fusion via SNARE proteins and tethering proteins, and membrane protein recycling via endocytosis and exocytosis. While basic cell biological studies will be considered, studies that relate cellular and molecular observations with physiological consequences are especially welcome.

The authors should indicate in a cover letter that their manuscript is submitted in response to this call for papers, and they should select “Protein and vesicle trafficking, cytoskeleton” as the submission category using the button on the APSCentral website.

Please contact the Editor-in-Chief, Dennis Brown, by e-mail for more information (ajpcell@rcn.com).

CALL FOR NOMINATIONS

for the Editorship of

*Physiological Reviews*

Nominations are invited for the Editorship of *Physiological Reviews* to succeed S. L. Hamilton, who will complete her term as Editor on December 31, 2008. The Publications Committee plans to interview candidates in the Spring of 2008.

Applications should be received before **February 15, 2008**.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Kim E. Barrett, Ph.D.
APS
9650 Rockville Pike
Bethesda, MD 20814-3991
Recruiters: Don’t miss this important message!

TO: Recruiters wanting to promote open positions, fellowship opportunities, programs, or conference announcements.

TIME: Now

MESSAGE: The publications of the American Physiological Society (APS) are a perfect way to advertise to research investigators, clinicians, educators, and information specialists in all disciplines of physiology. And now the full issues of almost all the APS journals are made available online in a pdf format. So your ad gets additional exposure online for free. Also, frequency discounts are given for running ads across the APS journals.

NOTE: Quarter, half, and full page ad sizes are available. Issues close 45 working days preceding the issue month.

ACTION REQUESTED: Email your ad to adnet@faseb.org for a quote.

THE APS JOURNAL LEGACY CONTENT is an “online package” of over 100 years of historical scientific research from 13 American Physiological Society (APS) research journals. This Legacy Content is FREE to APS Members ($2,000 for nonmembers). It is a separate program from the Subscription Program in that you pay once for perpetual access to the online content from these APS journals from 1898 to 1996-1998, depending on the journal. This content goes back to the first issue of each of these APS journals—including the American Journal of Physiology, first published in 1898. This Legacy Content can be viewed as completely searchable scanned images of the printed pages.

MEDICAL SCHOOL FACULTY

The University of Medicine and Health Sciences, St. Kitts, will be opening our doors to our first MD Program in January 2008. Established by the founder and former owner of the Ross University School of Medicine, this beautiful, 10 acre oceanfront campus on the Caribbean Island of St. Kitts houses a state-of-the-art-facility that compares with the best medical schools in the world. In order for UMHS-SK to provide a medical education second to none, we seek only the finest faculty members under the direction of the Provost/Dean of Medicine and invite applications for

PROFESSOR OF PHYSIOLOGY

Minimum qualification for these positions is an earned master’s degree in subject area. A Doctoral degree is preferred. Recent experience teaching in an accredited MD program in the U.S. is highly desirable.

A full description of the positions listed above can be found on our website www.umhs-sk.org/hr

We offer a TAX-FREE annual salary, an idyllic environment, and the opportunity to become involved in the growth and success of the institution.

Please submit a letter of interest, CV and references to:
The University of Medicine and Health Sciences, St. Kitts
North American Administrative Offices
460 West 34th Street, NY, NY 10001
Fax: 212 279-8640 or email: MBruce@ross-central.com

EDUCATING THE NEXT GENERATION OF PHYSICIANS

The American Physiological Society (APS) provides leadership in the life sciences by promoting excellence and innovation in physiological research and education and by providing information to the scientific community and to the public.

The Awards, Grants, and Fellowships programs are designed to strengthen and shape the discipline through awards that support, recognize, and publicize the scholarly and research activities of APS Members.

For Full Details or Questions... on all awards, grants and fellowships, visit the APS web site at:

www.the-aps.org/awards
Developing Countries’ Access to Information for Life

Access to current international peer-reviewed research is an essential element in enabling scientists, researchers, policy-makers and medical practitioners in developing countries to find local solutions to local health, environmental, social, economic, and food issues.

To answer this call, this journal is available free or at very low cost within institutions in more than a hundred of the world's poorest countries in partnership with the World Health Organization's HINARI initiative.
